

StreamVault — Audience Behavior & Engagement Report

Data Analytics Team | Q1 2025

Regional Engagement Insights

New York remained the top-performing city in January 2025 with the highest engagement scores, attributed to strong Premium subscriber density and high broadband penetration. Los Angeles showed the strongest month-over-month growth (+28%) in April 2025, driven by influencer campaigns targeting the creative professional demographic. Houston emerged as a surprise performer in Sci-Fi content, with 42% above-average completion rates. Mumbai showed high engagement in Drama and Romance categories.

Device & Platform Trends

SmartTV viewing grew 38% YoY and now accounts for 44% of total watch time, up from 32%. Mobile remains highest for content discovery but lowest for completion rates (61% vs 84% on TV). Tablet usage declined 12% YoY. Cross-device viewers (those using 2+ devices) show 2.3x higher monthly engagement and 67% lower churn rate.

Weekend-Only	20%	5.8	8.7%	Action/Horror
New-User	12%	2.1	22.4%	Mixed

Comedy Genre — Root Cause Analysis

Comedy titles showed consistent underperformance in Q1 2025. Investigation reveals: (1) Audience mismatch — 65% of comedy viewers are Casual segment with highest churn rates. (2) Competitive landscape — free streaming alternatives offer comparable comedy catalogs. (3) Production quality perception — user reviews cite 'formulaic scripts' and 'predictable plots'. (4) Poor discoverability — comedy titles receive 30% fewer recommendation slots due to lower engagement signals. Recommended action: commission 3 original comedy series with \$15M budget targeting 25-35 demographic.
